Subject: License application hearing for Asda express Hadley

You don't often get email from lesgimports@hotmail.com. [Learn why this is important](#)

CAUTION: This email originated from outside Telford & Wrekin Council's network. Do not click links or open attachments unless you are sure the content is safe.

Emails sent to Asda express commenting on dangerous driving on their premises. These emails were ignored and not even acknowledged.

Location of problem Hedley Park services Hadley Park Rd., East Telford TF 16QJ
I was at the station last night at proximately 1130 on the 13/9/23 where I observed three boy racer cars driving at the speed through your filling station pumps, then proceeding to turn and spin the wheels. This is not the first time this type of behaviors occurred at this station. It has become a central base for the local boy Racer gang .

Going to see the police tomorrow, but what I'm concerned about is this must've been captured on your video system and the registration numbers would be recorded

Although this email is from myself. If you require proof, I can get emails from other Residents and local businesses, including a Marstons Fallowfield, Public House and travel lodge establishment where customers have frequently complained about Not being able to sleep due to the noise of revving engines from this service station

I'm sure you will Be concerned at the effect of your establishment on the local community and businesses. I feel something must be done at the very least some speed bumps to stop these idiots racing around your service station.

I Appreciate this is not your typical complaint but I would appreciate it. If you could give it, your utmost attention.as the Behavior is potentially life-threatening

Fwd: Additional information Antisocial behavior, dangerous driving Hadley park services

Further to my last last email, which is attached I'm disappointed I have not yet had no response. This is a serious matter. This establishment you were running in this location has become the base and playground for cars. Exhibiting dangerous driving an antisocial behavior as an instance last night at about 1910 which would be wed 27 th

I have saved a car driving, spinning its wheels, exiting your filling Station revving its engine excessively on the full court, then driving at the speed onto the main road without stopping immediately overtaking another car that was driving.

Normally this surely must be captured on your vocal camera I have informed the police of this.

As the pool as the garage is your responsibility, I would appreciate perhaps your help in examining this footage, and perhaps passing it on to the police

For a more immediate response, perhaps the social behavior officer For Telford and wrekin counsel, Jonathan Phelps

I hope you will please take this seriously as one day soon somebody is going to get seriously injured

Yours les gosling
