

2022/23 Financial Monitoring Report

“Despite experiencing record levels of inflation and more people than ever needing our help during a cost of living crisis, we remain on track to deliver award-winning council services within budget this year. Strong financial management means that we have planned for the unexpected and have contingency funds that can be used. The situation remains tight as we head towards the end of the financial year and we keep the budget under continuous review so that we can take action where it is needed.”
