 The Contractor is to check and verify all building and site dimensions, levels and sewer manholes at construction points before work starts. The Contractor is to comply with all requirements with current Building Regulations, British Standard Specifications, Building Regulations, Construction (Design & Management) Regulations, Party Wall Act 1996, whether or not specifically stated on this drawing. This drawing must be read with and checked against any structural, geotechnical or other specialist documentation provided.  
 This drawing is not intended to show details of foundations, ground conditions or ground contaminants. Each area of ground must be investigated by a suitable method (including drainage) must be investigated by the Contractor. A suitable method of foundation should be provided allowing for existing ground conditions. Any existing or field ground contaminants on or within the ground, should be further investigated by a suitable report. Any geotechnical considerations should indicate special slopes for guidance only & where existing trees are to be retained they should be subject to a full Arboricultural Inspection for Safety. All trees are to be planted to an to ensure they are a minimum of 5 metres from buildings and 3 metres from drainage and services. A suitable method of foundation is to be provided to accommodate the proposed new planting.  
 Sketch proposals are for illustrative purposes only & as such are subject to detailed site investigation including ground conditions / contaminants, drainage, design & planning consent / regulatory. Sketch proposals may be based upon arrangements of OS plans & visual estimations of existing site features, accuracy will therefore need to be verified by survey. Sketch proposals have not been considered in respect of CDM Regulations.
